## Summary

After various experiences in the past 2 years, I have emerged as a fresh web developer after acquiring technical skills from the Monash Coding Bootcamp. I am a keen learner and am looking to work with fellow developers to build impactful technologies. As a Masters graduate, with a year of full-time experience in the IT industry. I have developed skills including critical thinking, communication and teamwork capabilities. I aim to further understand people, relationships, interactions and the technological applications that can be used to enhance work-life satisfaction, efficiency and productivity through the combination of studying a Bachelor of Science (Psych) and Masters of Business Information Technology.
